192.168.4.236	2	1 M11-M12 2015/04/14 10:53:51

2. Low installation costs

It is the easiest and simplest one in market by using WiFi, Camera based sensors can be mounted without any screws. There is no need for any tool for mounting or unmounting of sensors. Only one pair of low voltage AC cable is enough for power distribution. POE switches and CAT cable required for WiFi Access Points only.

3. Tested and proven in many projects

More than 50 thousand spaces in operation for more than 6 years.

5. Fully automated guidance system

No human intervention is required to verify an empty or filled area. This feature increases productivity.

4. Proven to be 99.9% accurate for empty or full spaces.

Parkmaestro's intelligent software and reliable hardware are backed by incredible technical support to ensure that your parking space numbers and signs are correct

6. Maximizes your Parking space usage

Parkmaestro's bright space indicators are very easy to spot even in the darkest and most remote corners of your parking lot.

7. Reduces management and operating costs.

Parkmaestro requires low maintenance. To manage the entire parking lot from computer or smart devices will reduce required resources.

8.Can be easily integrated with other systems

Payment systems

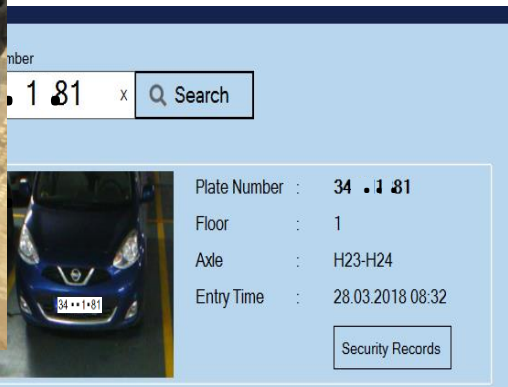

Mobile apps

Building management

Fire, gas measurement and alarm systems

Plate recognition driven barrier systems

Existing signage

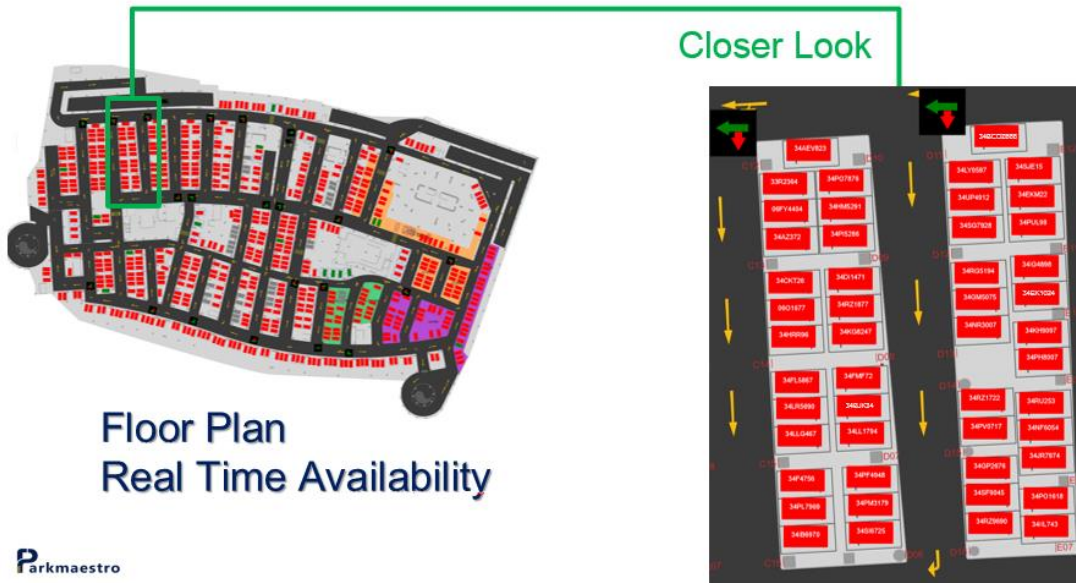

9.Increases security and reduces parking space abuse

Parkmaestro offers multifunctional camera sensor technology that monitors parking spaces, records videos and recognizes license plate numbers. High definition video recording for each parking space will reduce conflicts. Because of intelligent algorithm of recording and transferring video, very low data bandwidth is required in network.

10. Fully integrated system

Entire parking lot can be controlled starting from entrances up to very remote spaces by camera-based sensors, displays, counters, signage and parking applications. They are seamlessly integrated.

11. Real-time statistics and reports improve area management.

Innovative smart parking technology delivers instant reports and feedback.

With Parkmaestro, you can customize your reports to optimize your system and serve your customers better.

12. Parking Apps can be customized to your specific needs and requirements

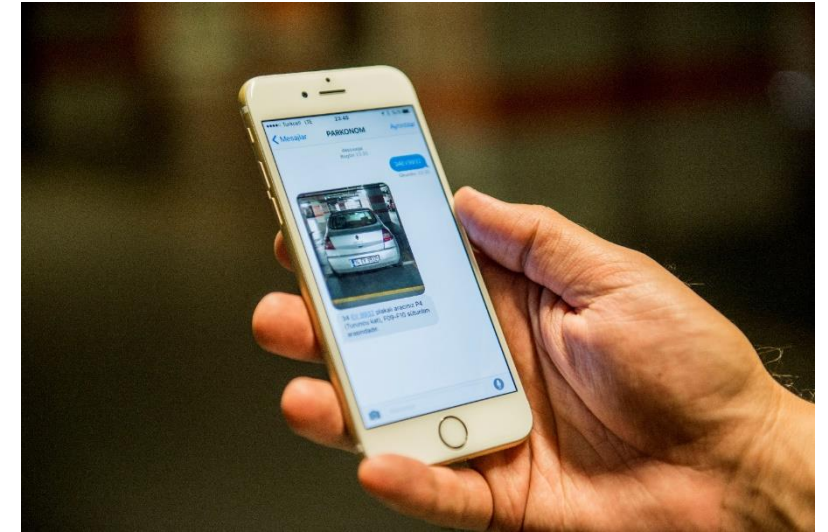

The Parkmaestro customizable app guides customers quickly to their destination by showing which areas and where they are located. Parking fees and payment options are also shown.

Use Kiosk
Enter Your Licence Plate Number
Get Your Car Lot Info
Yes, that easy!

Where is My Car?

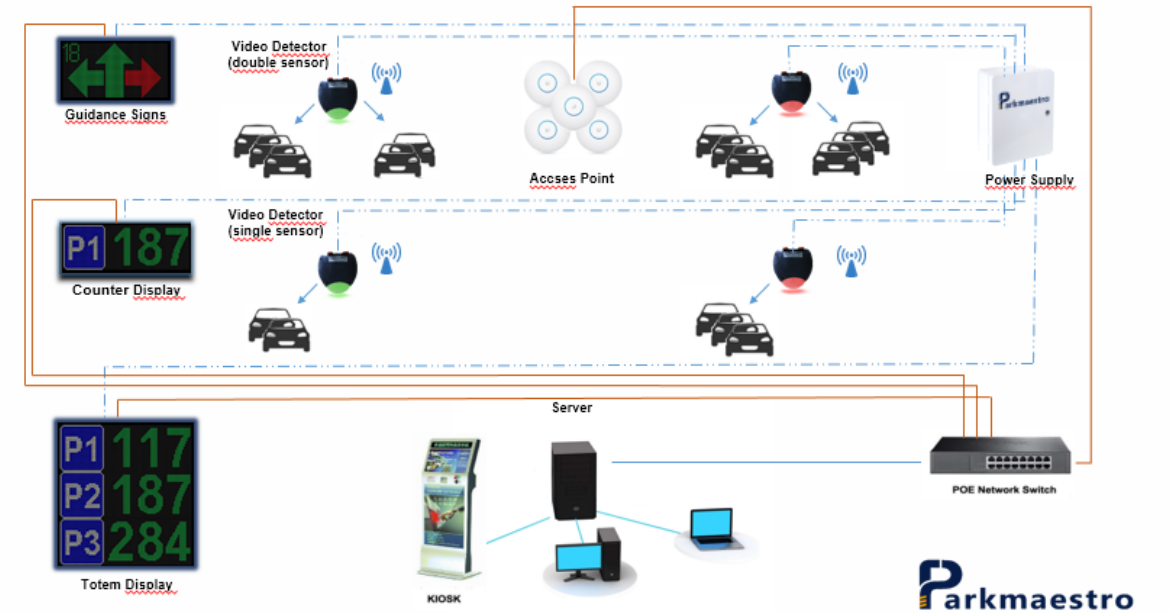

13. "Where is my car?"

This question is very easily replied by using Kiosks or Parkmaestro's car finder app.

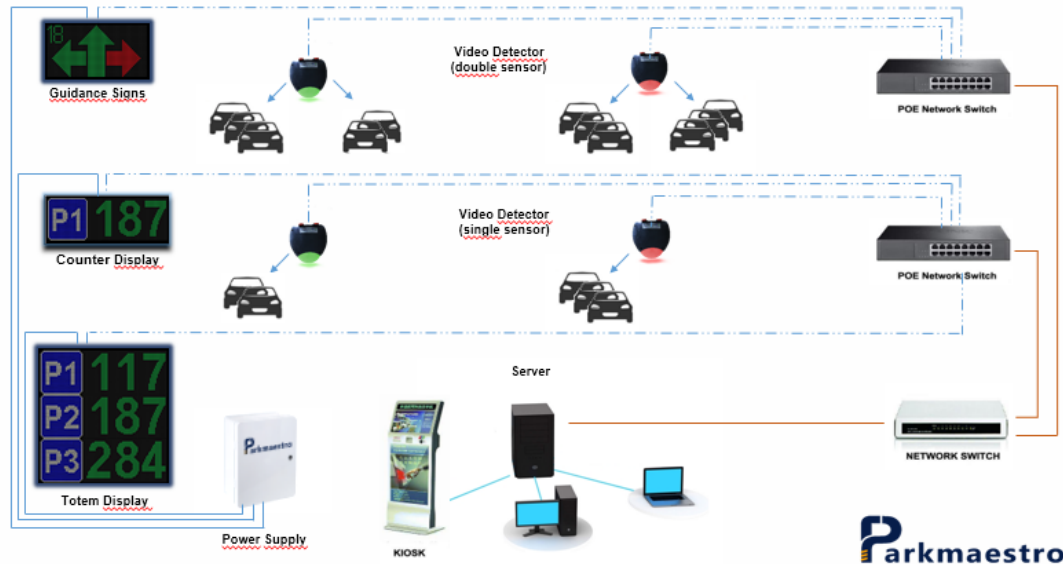

14. POE version is also available

WiFi version is very cost effective solution but if customers insist on wired communication, there is a POE version for all units.
